UC Santa Cruz - Silicon Valley Extension
Sept 2015 - present

Bachelor's Degree In Computer Science Engineering,

AISSMS'S college of Engineering, Pune.

May 2006- May 2010

PROJECTS

Shopping Express Website —

This project is smillar to mini Craigslist where the user can search for and browse services, sales and job postings based on different categories. Users can also login and create their own postings, which then appear in search results. The login information and posts get stored in a MySQL database with four tables and accessed using queries from PHP scripts..

**Technologies: LAMP (Linux, Apache, MySQL, PHP) Stack, HTML
Date: April 2017.**

Student Grade Calculator –

This java program uses java classes, objects, exception handling and collections. The program reads the student data from an input file specified on command-line, calculates student averages and grades across all subjects for all students and writes the results into the given output file in a sorted order.

**Technologies: Java , Eclipse
Date: Nov 2015.**

Web design demo projects using HTML5 and css –

Links to my demo websites showcasing HTML5 and CSS skills:

Use of HTML5 Canvas -
http://audreysclassroom.com/ucsc/gadale/canvasAssignment.html

Use of geolocation -
http://audreysclassroom.com/ucsc/gadale/geolocation.html
